WEB DEVELOPER

Accomplished professional in web development with 4 years of experience and a passion to
create IT products and solutions which would help people in the most humane, sincere and reliable ways as possible. I adore working in healthcare, education and business fields. I'm capable to design, implement and maintain wide variety of systems, including enterprise applications with medium sized teams or individually. Strong in web development using both, server side and client side technologies.

Currently I'm working as a Full Stack Web Developer with .NET Core, NodeJS, React, Redux, Redux saga, Typescript, ES7 and Bootstrap 4.0 technologies. Interested in Blockchain methodologies, Etherium, ICON projects. Following the news, trying them out by developing some of the demo projects. I passed my MCSD: App Builder certification and I 'm looking forward to pass some more to prove my skills and worth. I'm really fascinated with how new technologies are developing and I am proud of myself being a part of it.

I'm always looking forward to interesting projects, new opportunities to grow and level up my career. I'm eager and not afraid to learn and try new technologies, methodologies and patterns. Gaining fresh and new experience is my ongoing lifetime goal. I've been a student since I was a little boy - gaining and sharing knowledge is what I do best.

KEY SKILLS

Core Languages:
   Very good: C#, SQL (T-SQL), JavaScript, HTML, CSS;
   Good: Java, XML, JSON, UML;
   Basic: C++, PHP, Visual Basic;
Databases:
   Very good: MS SQL Server;
